

Invitation from the Mayor of Hangzhou City

Dear friends in the light and lighting field,

It is an honour that CIE 2012 Lighting Quality & Energy Efficiency conference will be held in Hangzhou this September. On behalf of the People's Government of Hangzhou City, I would like to invite scientists, engineers and industry of the field of light and lighting, and people who are concerned about energy and lighting all over the world to get together at West Lake of Hangzhou, where we will discuss the issues on reducing energy consumption in lighting, promoting lighting quality, and creating a healthy and comfortable lighting environment.

With a long history, Hangzhou possesses colorful natural and culture landscapes. In recent years, Hangzhou has paid close attention to the development of the lighting industry, as well as the application of green lighting products, and it is selected to be in the first batch of model cities in the national "Ten thousands of luminaires in tens of cities" project, and also one of the High-tech industrial bases of the National Solid State Lighting Project. I believe that this international meeting will greatly promote the development of the industry in Hangzhou, and facilitate the communication and cooperation with organizations such as CIE and CIES. We hope to contribute more to the brilliant future for all human beings.

All friends in the light and lighting field are welcome to Hangzhou, the so called "Paradise on Earth", in the golden autumn.
