

Steve Coyne is an independent lighting consultant who consults to various design groups as well as the Federal, State and Local Governments on Energy Efficiency initiatives and policy implementation in lighting and daylighting. He represents the Australian government as a member of the expert committee of the Solid State Lighting Annex for the Energy Efficient End Use Equipment program within the International Energy Agency as well as assisting Lites.Asia activities.

He is a physicist who has specialized in photometry, lighting and daylighting and spent 18 years as a lecturer at the Queensland University of Technology. Steve lectures in post graduate lighting courses he helped to establish in Australia and Hong Kong and is currently a Visiting Fellow at QUT.

He is currently the Chairman of the Australian Council of Built Environment Design Professions and the President of the Illuminating Engineering Society of Australia and New Zealand.
