

CIE2012 Workshop on

## Energy Efficient (Green) Lighting

Workshop Convener: Yandan Lin, Institute for Electric Light Sources, Fudan University, Shanghai, China

Shuming Hua, The National Lighting Test Centre of China, Beijing

### **Abstract**

During this workshop, discussion will focus on technical possibility to reach energy efficient (green) lighting, including:

- Good lighting design for energy efficient application
- Improving technology of lighting products
- Control technology and strategy
- Combination with renewable energy
- Evaluating method or standard based on the consideration of both energy efficiency and quality

The workshop will start with 2 oral presentations with the titles as following:

Nakamura Yoshiki: ENERGY- SAVING OFFICE LIGHTING DESIGNED WITH LUMINANCE IMAGE

Qiu Yue: RESEARCH AND APPLICATION ON EVALUTION INDEX SYSTEMS OF HIGHWAY TUNNEL ENERGYSAVING LAMPS

After the 2 presentations, the participants of this workshop are welcome to give any comment or suggestion on the above 5 items and finally a summary with possible technology to reach energy efficient lighting will be given by the convener.
