

Yoshi Ohno is a NIST Fellow and Group Leader of Lighting and Color Group, Sensor Science Division at NIST. His group maintains the national standards of the lumen, candela, and other photometric units and colorimetric scales for USA. He received his Ph.D. in engineering from Kyoto University, Japan. He started his career at Panasonic, Osaka Japan before joining NIST in 1992. His research spans from fundamental photometry and colorimetry, to color rendering and solid state lighting, and published over 100 articles. He served as CIE Division 2 Director in 2007-2011, and now serves as the CIE VP Technical, as well as chairing a few TCs. He received CIE de Boer Gold Pin Award in 2007. He is also a Fellow of IESNA, active in standardization for solid state lighting in ANSI, IESNA, and CIE, and is also known as the primary author of IES LM-79 and ANSI C78.377.
